Re: EPA Docket No. CAA-2000-0104

Dear Regina Thompson,

Please find enclosed a written narrative in response to the above referenced EPA Docket No.

- 1) Columbia Ready-Mix, Inc. is presently located and operates 6 permanent sites in Yakima and Kittitas County's for their production of sand, gravel, crushed rock, ready-mix concrete, and hot asphaltic concrete. Not all products are produced at every site. Columbia Ready-Mix, Inc also operates at other sites in the state of Washington on a portable temporary basis.
- 2) Columbia Asphalt does not operate any production facilities.
- 3) See attached map #3
- 4) See attached legal description of AK Anderson and Parker.
- 5) See attached Map #5
- 6) The Columbia Ready-Mix parker asphalt plant facility was moved in 1999 because the aggregate supply at the Parker location has been depleted since 1989 and crushed rock for the production of asphaltic concrete and sand and gravel for the production of concrete has been hauled from off site sources to the Parker facility since 1989. Numerous attempts to obtain sand and gravel reserves from Indian lands on a royalty basis in the Parker area have been fruitless.

- 7) Columbia Asphalt and Columbia Ready-Mix share common workforce.
- 8) Because of an apparent misunderstanding of the complete nature of Columbia Ready-Mix, Inc. operates as supplier of many different construction materials, and Columbia Asphalt operating as a contracting company and purchaser of construction material. I am requesting an extension of time for responding to questions 8 through 20. Perhaps it would be best to re state some of these questions with the information provided in the responses to questions 1 through 7 in mind.

I have also enclosed a copy of the last source test done for the asphalt plant located at the AK Anderson pit site.

Thank you,

Leonard Sali, President
Columbia Ready-Mix, Inc.
